PROFESSIONAL SUMMARY

Flutter Developer with 3.8+ years of experience building and shipping scalable, cross-platform mobile applications for Android and iOS. Skilled in Flutter, Dart, REST API integration, Firebase, and modern state management (Riverpod, Provider). Delivered 5 production apps published on the Google Play Store, from UI development through backend integration, payments, and real-time features. Strong problem-solving skills with a focus on clean architecture and smooth, user-friendly experiences.

SKILLS

- Languages & Frameworks: **Flutter, Dart**
- State Management & Architecture: **Provider, Riverpod, MVC, MVVM, Clean Architecture**
- Backend & APIs: **Firebase (Auth, Firestore, Messaging), REST API Integration, HTTP, Dio**
- Payments & Monetization: **Stripe, In-App Purchase (IAP), RevenueCat**
- Tools & Version Control: **Android Studio, Antigravity, Visual Studio Code, Git, GitHub, Postman**

EXPERIENCE

Codiant — A YASH Technologies Company
Associate Software Engineer | Apr 2023 – Jun 2026

- **Baurow App:** Built a peer-to-peer rental marketplace application using Flutter and Firebase. Implemented item listings, booking workflows, real-time chat, push notifications, and Stripe payment integration.
- **CalCounts Pro (Instructor Dashboard):** Engineered a tablet-optimized instructor dashboard enabling trainers to monitor client performance, nutrition metrics, and progress insights through responsive data visualizations.
- **HireGroww App:** Created a multilingual recruitment platform with interview recording and hiring workflow management. Integrated AI-powered candidate evaluation, localization, and scalable REST APIs.
- **Fitterloop App:** Designed and implemented UI components, integrated food scanning capabilities, and connected backend APIs to deliver a responsive user experience.
- **Glowpeer App:** Developed a skincare tracking and community platform featuring routine management, product tracking, reminders, and social engagement features, helping users organize routines and monitor progress.

Imaginar Technologies
Associate Software Engineer | May 2022 – Nov 2022

- **FoodIngram App:** Worked on UI and API integration for a multi-role food delivery app, including separate modules for customers, shops, and delivery drivers.
